

1211 Biochemical Sciences Building

The touch panel is generally asleep when beginning.

Touch the screen twice to awaken.

1. Push the **ON** button.

2. Choose **SINGLE PROJ**, **DUAL PROJ**, or **AUDIO ONLY MODE**

Choosing **SINGLE PROJ** will start the stage right projector **ONLY**. **DUAL PROJ** will start both right and left projector. They will project the same single source. The screen(s) will drop automatically... just wait 30 seconds.

3. Push **LAPTOP** as source. Connect with VGA cable. If you have audio in your presentation, use the attached 1/8' audio plug.

ADVANCED PAGES

allows you to control the lighting, audio and projectors

Pushing the **LEFT PROJ** and **RIGHT PROJ** (stage l&r) buttons powers on and off the projectors and raises and lowers the screens.

Be advised that selecting a projector in use forces a cool-down procedure. If you shut a projector unit down it will take five minutes before you will be able to reuse it.

Lighting controls

Audio

Please shutdown the equipment upon completion of lecture
