

Posters

We print on paper or vinyl. Same price. Please check your preference on the job ticket.

When setting up your poster please note: **One** dimension **CAN NOT** exceed 42 inches (The paper/vinyl width is the limiting factor).

If you have made your poster larger than 42 inches in both dimensions, we will shrink it when printing.

We can print posters from Macs or Windows. If you use Linux, please save the file as a pdf.

Files types: Powerpoint, Illustrator, Photoshop, InDesign or PDF

We can print a mini poster for you to proof your poster (12x18 inches).

We charge \$5.00 a square foot.

Powerpoint users:

Powerpoint will not allow you to make a “slide” larger than 56 inches.

If you must make a poster larger than that in powerpoint, we suggest you make your poster half size. When printing tell us that you need it larger and we will make it the correct size.

Example: You would like a 42x72” final poster You would make a 21x36” poster
Be sure to insert high resolution images that can handle doubling in size.

Illustrator and InDesign users:

Remember to **Embed** your linked files when you are ready to bring us the file.

See “Embedding Images in Illustrator” if you are unsure what this means or how to embed images.
